

HIGH TEMPERATURE DRY CALIBRATOR

200°C to 1200°C

We offer best quality High Temperature Dry Calibrator that are made using nest grade raw material. Also known as DPI-1200, these are furthermore highly appreciated for portability and light weight. The rugged features of these products makes them highly sought after in the petrochemical and pharmaceutical industries. Our calibrators are used for testing thermometers and sensors ranging from 200.0 ~ 1200°C.

The total weight of these is 10.0 Kg.. Some specifications of these are listed below:

Temp.Range	: 200°C to 1200°C	Well Depth	: 120mm
Display	: Red LED for MV	Well Dia	: 32.0mm
	: Green LED for SV	Insert Size	: 31.75mm
Resolution	: 0.1°C upto 999.9°C	No.of holes &	: 6 holes
Accuracy	: ± 0.25% of span	Diameters	: 3.5, 5.0, 6.5, 8.5, 10.5 & 13.0mm
Stability	: ±1.0°C		
Supply	: 230 VAC 50 Hz		

Options : Insert with custom drilled bores

Standard supply includes: DPI-1200 Dry Temperature Calibrator, 6 hole insert, Clamp, Power Cord and Calibration Certificate Traceable to National Standards

Dealers :
