

Our organization offers Dry Temperature Calibrators (Item Code: DPI-1100) that are known for being highly portable. These are helpful in calibration and testing of thermometers and temperature sensors ranging from Ambient to 650.0 Deg C. Furthermore, our range is appreciated for its portability, light weight and rugged features. There is a great demand for these in the shipping and pharmaceutical industries. Some specifications of these are listed below:

Temp.Range	: 50 to 650°C	Well Depth	: 120mm
Display	: Red LED for MV	Well Dia	: 30.5mm
	: Green LED for SV	Insert Size	: 30.0mm
Resolution	: 0.1°C	No.of holes &	: 7 holes
Accuracy	: ± 0.15% of span	Diameters	: 3.5, 5.0, 6.5, 8.5 x 2, 10.5 & 13.0mm
Range	: 50 to 650.0°C	Heating Time	: 25min approx, from Ambient to 650°C
Stability	: ±0.2°C	Cooling Time	: 75mins approx, from 650°C to Ambient
Supply	: 230 VAC 50 Hz	Heater Wattage	: 1500W
Weight	: 6.5 Kgs approx.		

Options : Insert with custom drilled bores

Standard supply includes: DPI-1100 Dry Temperature Calibrator, 6 hole insert, Clamp, Power Cord and Calibration Certificate Traceable to National Standards

Dealers :
